

# creative portfolio

**hello, i'm  
Aman!**

I am Aman, a young man who is starting from scratch. My goal is to become an IT and AI specialist, to develop personally and professionally, and to achieve great results.

# starting skills

Python — beginner  
SQL — beginner  
Excel — beginner  
Mathematics — school level  
GitHub:

# What to improve?

**What to improve**

**Python → basic → practice + projects**

**SQL → beginner → course + tasks**

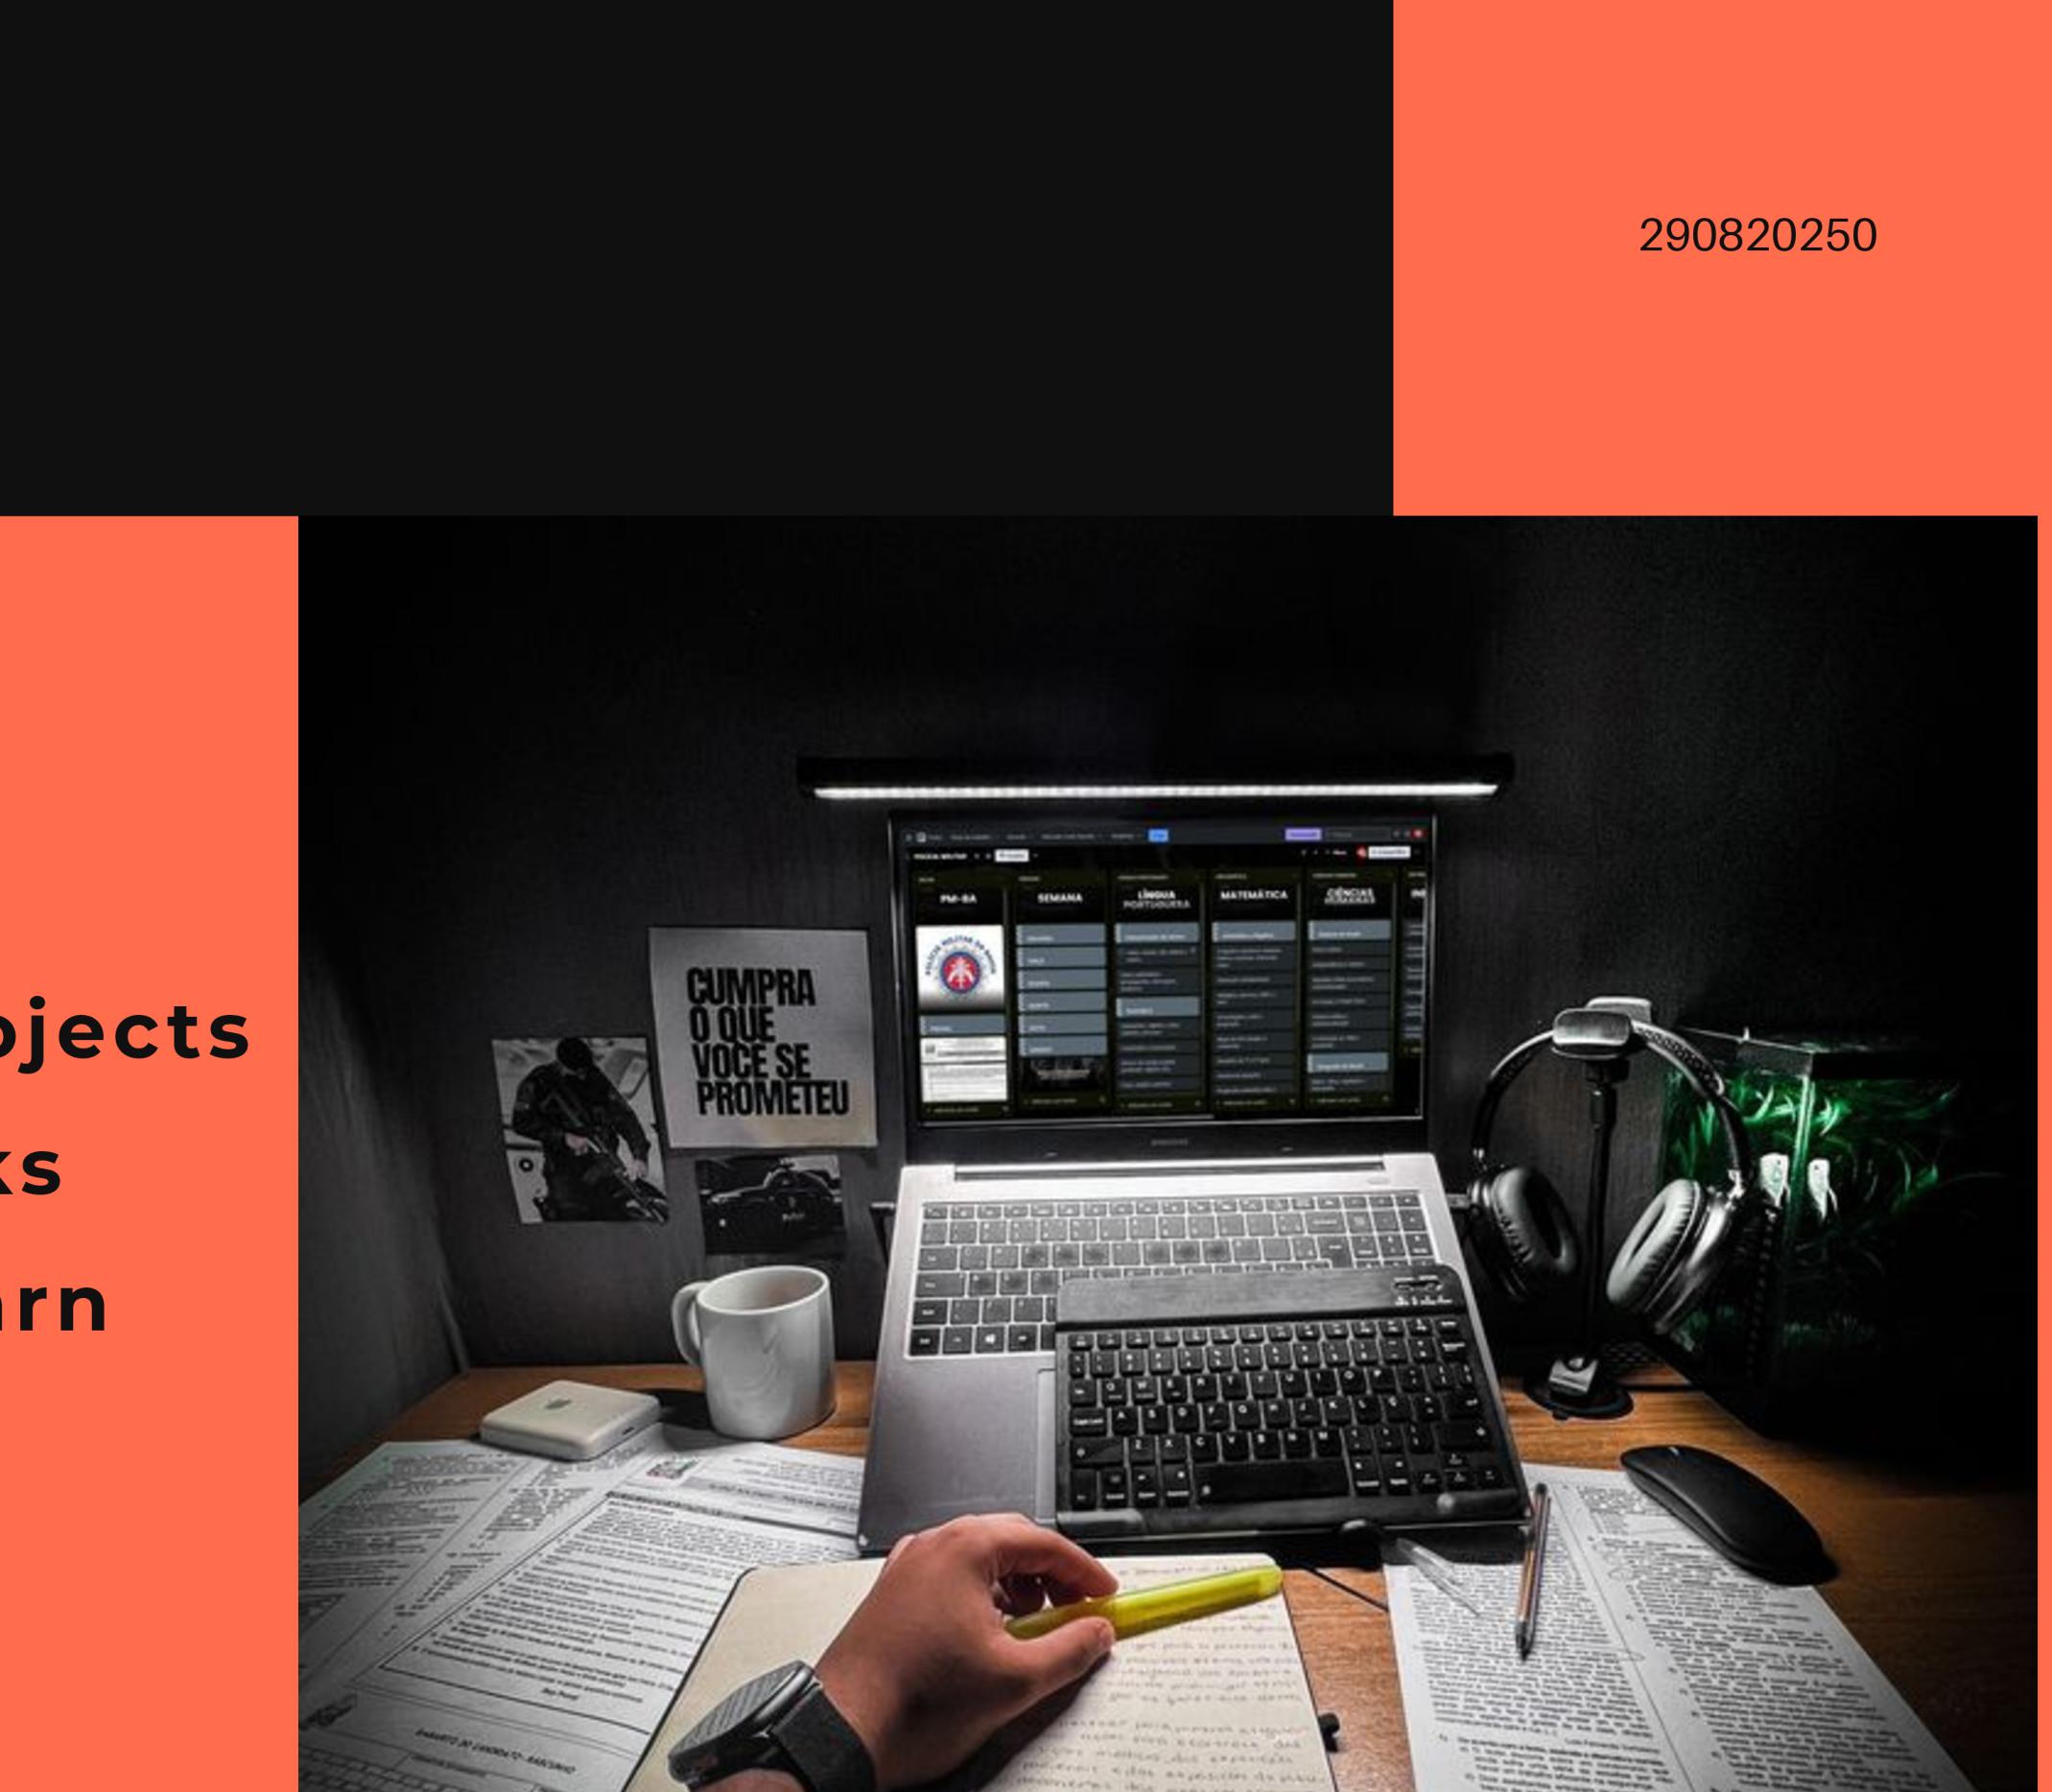

**ML → beginner → learning sklearn**

**English → B2 → practice**

# Course goals (SMART)

- 1. 1. Learn the NumPy and Pandas libraries**
  - **Measurement:** complete 5 practical assignments and 2 mini-projects
  
- 2. Create your first portfolio project (data analysis)**
  - **Measurement:** upload your project to GitHub
  - **Deadline:** by the end of the course
  
- 3. Understand 3 ML algorithms (linear regression, logistic regression, KNN)**
  - **Measurement:** explain to the teacher/in the blog, implement the code
  - **Deadline:** until the end of the course

## Personal Presentation

thank you so  
much!
